

abakus solar USA Inc. sells 7 MWp free field project development

(Mynewsdesk) Gelsenkirchen / Richmond (VA), 18.07.2014

abakus solar USA Inc., a 100 % subsidiary company of German abakus solar AG has successfully developed a free field solar photovoltaic project in the USA. The project is located in the eastern shore of Maryland.

The Church Hill Solar Farm will have a generation capacity of 7 MWp. abakus solar USA Inc. has been leading on the full project development process, including obtaining the CPCN, WMPA and IA agreements, and coordinating design, engineering, planning and grid connection with local authorities and the state of Maryland.

"We are very proud of having successfully finished our first large scale project development in the USA!" says James Huff, CEO of abakus solar USA Inc. "We are currently looking at various other project development opportunities at the moment and will increase our efforts in high quality project development of utility scale photovoltaic projects in the US!" James Huff adds.

The project development has been sold to a financial investor and abakus solar USA Inc. is consulting the investor on a tender process for EPC services for the execution of the project.

"The development of this ambitious 7 MWp photovoltaic project in the US is a success for abakus solar AG as well and demonstrates our capability to act successfully in the most promising world markets for solar!" says Roland Wigger, CEO of abakus solar AG.
