

Alexander Michel strengthens the management of fos4X

(Mynewsdesk) Alexander Michel joins the management of fos4X as second managing director since June 2020. Together with Dr. Lars Hoffmann, the founder and CEO of fos4X, he will complete the strategic management with his expertise in wind energy.

"fos4X convinces with innovation, creativity and profound technical expertise. I see great growth potential for our systems and solutions and I am very much looking forward to developing this potential together with our very agile and highly motivated team", says Alexander Michel, Managing Director and CCO of fos4X.

About Alexander MichelMr. Michel has more than 20 years of professional experience in business development and sales. His path led him to the wind energy sector as Head of Service Sales at Nordex in 2010. With a background in various management positions, he most recently worked for GE Power Conversion as Global Segment Leader Wind. Alexander Michel enriches fos4X, especially in the strategic orientation of the company, through his broad experience in business development in international business segments.

About fos4X

Founded in Munich in 2010, fos4X GmbH is a specialist for reliable, fiber-optic measurement technology and sensor technology as well as for innovative data analysis. It develops intelligent solutions for optimizing wind energy. These solutions are primarily used in wind turbines to optimize operation.

The fiber optic sensors and solutions are also used in the fields of electromobility, process measurement technology and railway technology.
