

Copper cathodes are used as a raw material feed for the production of high purity copper products.

Copper Cathodes form the basis for high-quality copper products.

Cathodes are basic products of copper production. They are produced in a marketable form at Montanwerke Brixlegg for use in high-quality applications. Copper cathodes from Montanwerke Brixlegg with specific maximum impurity levels are also registered and traded on the London Metal Exchange. More infos about Copper Cathodes you can find here: <https://www.montanwerke-brixlegg.com/en/products/copper-cathodes/>
