

AMD Collaborates with Aviary to Bring APU-Optimized Photo Editing Application to Windows 8

AMD Collaborates with Aviary to Bring APU-Optimized Photo Editing Application to Windows 8
AMD Radeon RG2133 and upgraded AMD Radeon RAMDisk deliver lightning fast memory performance for PC gaming
AMD (NYSE: AMD) today launched the AMD Radeon RG2133 Gamer Series Memory and Radeon RAMDisk 4.1. AMD Radeon RG2133 Gamer Series Memory is the only memory on the market that offers both XMP and AMP memory profiles in one package, enabling ultimate ease in overclocking on both platforms
AMD Radeon RG2133 Gamer Series Memory will ship with a free AMD Radeon RAMDisk 64GB, which features enhanced load-and-save functionality. When paired with an AMD A10 Series APU, AMD Radeon RG2133 Gamer Series Memory will improve frames-per-second (FPS) by up to 22 percent
Gamer Series Memory is part of AMD's Unified Gaming Strategy initiative that places AMD technology at the heart of digital gaming and plays a critical role that enables top performance, an outstanding experience and maximum value for PC gamers everywhere
AMD Radeon RG2133 Gamer Series Memory is armed with features designed to outperform the competition on any task, said Roman Kyrchynskiy, product director, Graphics Business Unit, AMD. "Designed with multi-platform compatibility in mind, the AMD Radeon RG2133 brings cutting-edge technology, as well as uncompromising quality and compatibility for PC gamers
The newly introduced Gamer Series Memory is composed of high quality components that help deliver top memory performance and reliability. With Dataram, AMD's memory manufacturing partner, AMD is proud to introduce Gamer Series to its product line up as well as the improved performance of AMD Radeon RAMDisk that allows gaming enthusiasts to load their favorite games significantly faster, saving time and eliminating frustrations
AMD and Dataram have worked together to significantly enhance the dynamic background load-and-save feature in order to create a seamless, non-volatile RAMDisk experience, said Jason Caulkins, CTO, Dataram. "This underscores AMD and Dataram's continued dedication to delivering the highest-performing memory products for PC enthusiasts
Features and Benefits of AMD Radeon RG2133 Gamer Series Memory
Support for XMP and AMP Technology: Designed and tested to ensure compatibility across multiple platforms
Suitable for Everyone: Great fit for casual to hardcore gamers and everyone in between
Unbeatable Value: Comes with free Radeon RAMDisk 64GB with enhanced load-and-save as well as lifetime manufacturers warranty
Stay Cool: Features high-grade aluminum heat shield for enhanced heat dissipation
AMD Radeon RG2133 Gamer Series Memory is available in the USA in early May 2013 through our launch partner, Newegg.com
